Re: DD Waiver Bulletin 11- Developmental Disabilities Profile (DDP) Score Update

Based on results from scores done to date, the Family and Social Services Administration, Division of Disability, Aging and Rehabilitative Services and Office of Medicaid Policy and Planning have determined that the score on the Developmental Disabilities Profile (DDP) to determine Level of Care for an ICF/MR should be 28. Please start utilizing this number immediately as you make Level of Care determinations.

At this point, "Non-Routine" Level of Care determinations must still be made by the Office of Medicaid Policy and Planning. Please continue to submit the requested documentation.

"Routine" individuals who were previously denied Level of Care because of a score between 28 and 34 will automatically approved and the Bureau of Developmental Disabilities Services will contact those individuals to begin the process of filling a waiver slot (if applicable). Changes will be made in the next couple of days to reflect this new score in INsite and DART.

Thank you for your help in this matter. Please contact Steve at 317/233-3828 or Alison at 317/234-1527 if you have additional questions.
